

Frühkindliche Geschmacksprägung

Aktuelle Forschung im Health Perception Lab der FH Joanneum

Die erste Geschmacksprägung des Menschen erfolgt schon im Mutterleib sowie in den ersten Lebensmonaten. Das neu errichtete Health Perception Lab – Labor für Sensorik und Gesundheit – der FH Joanneum in Graz widmet sich der Erforschung der genauen Mechanismen dieser Prägung. Interdisziplinäre Arbeitsgruppen kombinieren dabei angewandte Sensorikforschung mit Fragen der nachhaltigen Gesundheitsförderung, Prävention und Therapie.
